The odor is usually worse on Sundays. This morning I woke up and noticed the odor inside my house and when I let my dogs out it was extremely bad. I went to retrieve my laundry from the dryer and a horrible fecal odor hit me as soon as I opened the dryer door. I thought something was wrong with my clothes. I proceeded to smell all of my clothes as I pulled them from the dryer when I noticed a surge of the odor. By that time almost all of my clothes were out of the dryer and I noticed the odor.

She also noted that the square trucks going to the facility are not covering and material ends up on the roadway. She noted that while this is not as much of a concern when the sun is out and the roads are dry, the material rehydrates in the rain and becomes a slippery slurry that gets on vehicles and they carry it to their garages and homes and the odor becomes even stronger in the house. With the rain her area has had and the rain forecast for this weekend, she is worr ied that the lagoon may be gett ing full and asked that someone go out to do an inspection. The complainant states there are horrible odors coming from the farm when the wind is out of the East or Northeast and affects their family's ability to enjoy being outside.</p> <p>I received an email from the complainant (attached) describing the following: The smell from the plant on Herr Road is foul. Though not always, when the winds carry the smell towards the complainants property, it severely limits their ability to use and enjoy being outside. Complainant is concerned of the bacterial and viral contaminants, as well as pharmaceuticals and chemicals in the human waste being spread on the farms nearby that may pose a potential risk to the health of the complainant's family and others that live nearby. Additionally, complainant is concerned of the potential groundwater contamination, as all families in the area are on well water.</p>

	7757		13-Feb-18	SWDO	Hamilton, Kathryn	14-Feb-18				Complainant called to express concerns over the smell coming from the plant on Herr Road. The smell from the plant is extremely bad today and is causing the complainant to have issues with breathing, watery eyes, headache, and stomach ache. This is not the first time the smell has been so bad that it has caused the complainant to manifest physical symptoms.
	7071		10-Jan-18	SWDO	Hamilton, Kathryn	31-Jul-18				Complainant called about the odors coming from the anaerobic digester located on the property owned by Dovetail Energy. He stated the odors aren't typical of agricultural waste/manure, but rather those of human waste. He used "outhouse" to describe the smell. Additionally, he stated there has been a film/dust that accumulates on the picnic table outside and the cars and he is not sure if it is coming from the same facility or not. There is also manure on the road near the property. These issues have started over the last year. Complainant would like to remain anonymous, but would appreciate follow-up.
